

St George's College

WEYBRIDGE

Maths Quest 1

Please e-mail Mr Hudson with your solutions by **Friday 3 November 2017** and don't forget to include your name and your school's name.

The number 0-9 can be made using matches in digital form, see below, like you see on a clock or a calculator screen. By moving, or removing matches, we can change what is being displayed and hence change the calculations.

Try solving the four problems below, following the instructions for each. There may be more than one correct way to solve each problem!

Remove **one** match to make a correct calculation

Remove **two** matches to make a correct calculation

Move **one** match to make a different correct calculation

Move **two** matches to make a correct calculation

ajhudson@stgeorgesweybridge.com

All correct entries will be displayed on the St George's Weybridge website.
